Home/Tags Archives: Hodgdon Retumbo Here are some of my pet loads. They were what I found to be most accurate in my rifle after extensive and tedious load design. I can adjust the load a bit as the throat barrel collapses, but I don't usually change too far from what is shown here. You should always refer to the quality rebot guide and start with the minimum recommended loads and work your way up. Just because they turned out to be safe in my rifles doesn't mean they'll be in yours. Camera sizes, brass specs, barrel grooves and diameter can vary, so it's very important... More After I identified a promising range of powder scales using the ladder test Audetter, my next step is to use the Dan Newberry Optimal Weight Charge (OCW) Method to compensate for the scattering of knot disadvantage inherently present in the ladder test. To learn more about this, read this article by comparing the OCW method to the ladder test. The OcW method is based on observation that there are some loads out there (like match federal cartridges for 308) that shoot very well from just about any rifle. How does one recipe shoot so well from so many different rifles? Dan Newberry believes accuracy ... More Retumbo adds 40-100 fps more speed to these cartridges when.... I'm trying to come up with a good load for my 300 rum. The .300 Remington Ultra Mag (Lyman Reloading Handbook 49th Edition) reboots data with 102 loads. Powders include Hodgdon, IMR Stop shooting at the first sign of excessive pressure or noticing changes in the firearms report. This guide contains data on more than 70 of the most popular rounds of centerfire rifles used today. .300 RUM (Remington Ultra Magnum) - Manufacturer download data. Never exceed maximum loads because excessive camera pressure will result.3. Pistol; Rifle; Cowboy; G. If you are interested in the most up-to-date data for cartridges and/or bullet weights/styles not listed on this page, contact The Barnes Consumer Service to find out about the recommended loads and approximate timeline for the data that will be available by email at customerservice@barnesbullets.com or by calling 800.574.9200. It had the average weight of a stainless, fluted barrel, finished at 26. IMR recommends always www.IMRreloading.com advice to obtain the most accurate and accurate data. Nosler data shows that their 180 grain bullets can be brought to MV 3089 fps at 92.0 grain H1000, or a speed of 3225 fps at a maximum load of 96.0 grain H1000 powder. Choose a cartridge. Tip: Choose a rifle that suits your body with features that you choose in a caliber that has all the power you ... Hornady Manufacturing Company develops and publishes Occasionally, we will temporarily publish load data on this page when the bullet becomes available and are not yet listed in the latest edition of the manual. It provides maximum speed and performance with heavier bullets in the magnums. The following loads were developed in the Remington Model 700 Sendero rifle. Using bullets from the Swift Jacket Scirocco, Nosler Jacket Ballistic Tip, #311644 gas check, Swift Jacketed A-Frame. Then select the weight of the bullet, the powder maker and the type of powder. 103.0- 2998fps, 3008fps, 2975fps. Cartridge. I'm still testing loads, so I'm not off the bench. Powders include IMR, Hodgdon, Accurate, Alliant, Vihtavuori, Ramshot OAL was 3,515 with Rem brass, 142 SMK and CCI LRM primer. I thought my later accurate guide to downloading weapons data didn't help, but the old red has the following. I will most likely shoot 180-210 grain bullets, which powder will give the highest speed, Retumbo or RL-25? All the loads had a hard bolt lift. 1. 104.0- 3019fps 105.0- ... The next trip is going to take me prone to 800yds. Well IMR-8133 wouldn't be an option for my 338 Terminator (338 Lapua improved with plus P throat) I started my load test on 103.0 grains, pushing 300 grain Berger Elite Hunter. Things I have are regular old 4631 (not a short cut). Retumbo This magnum, extruded powder was designed specifically for really large cartridges such as the 7mm Remington Ultra Magnum, 300 Remington Ultra Magnum, 30-378 Weatherby Magnum, etc. It was stocked in the H-S Precision Stock with aluminum block bedding. I will soon be getting the Remington 700 Sendero SF II Chamber in .300 RUM. Find what you need in four simple steps.
